ABOUT ME

Detail-oriented and analytical IT professional with hands-on experience in Quality Assurance and Quality Control. Proficient in testing web applications, APIs, and mobile applications to identify functional and UI issues, ensuring optimal performance and compliance. Skilled in troubleshooting and in preparing comprehensive documentation, including system requirements for new features and API specifications, while collaborating across teams to ensure the delivery of high-quality software solutions.

EXPERIENCE

FEB - APR (2025)

Bapplware Technologies Inc.

SOFTWARE QUALITY ASSURANCE TESTER INTERN

- Created and maintained structured API documentation for the company's HR system using Postman and Swagger.
- Conducted manual API testing for the HR system, validating endpoints, authentication, and data accuracy.
- Collaborated with QA and developers to analyze requirements, track bugs, and ensure HR system features met business needs.
- Participated in Agile sprints, including planning, stand-ups, and retrospectives.
- Documented testing processes and results to improve HR system quality and ensure compliance.

AUG - CURRENT

MNleistung Inc.

SOFTWARE QUALITY ASSURANCE / QUALITY CONTROL

- Key QA personnel for eiPrograms, including eiMAN Task Management, responsible for manual and functional testing of web and mobile applications, Kanban boards, and project management features.
- Conducted manual and functional testing for web and mobile applications, including task management systems, Kanban boards, and project management platforms.
- Validated feature performance across different browsers and devices, ensuring responsiveness and data accuracy.
- Collaborated with developers to create requirements, documentation, and test cases.
- Logged and tracked defects, verified fixes, and ensured compliance with project standards.
- Performed API testing using Postman and Swagger to support the mobile development team and ensure accurate backend integration.

SKILLS

- Manual & Functional Testing: Web and Mobile applications
- API Testing & Documentation: Postman, Swagger
- Bug Tracking & Defect Management: Trello, Jira
- UI/UX & Responsiveness Testing
- Automation Testing: Katalon IDE Web Extension
- SQL Querying & Data Validation
- Test Case, Test Scenario, and Requirements Documentation
- Analytical & Logical Thinking: Detail-oriented problem solving
- AI Prompting & Assistance: ChatGPT, Claude, Deepseek

PROJECTS & SYSTEM HANDLED

HRP Integrated System (Human Resource Platform)
- HR system covering timekeeping, attendance, recruitment, and employee data management.
- Conducted API Testing, validating endpoints, workflows, and data consistency.
- Performed User Acceptance Testing (UAT) to confirm feature readiness and business rule compliance.
- Managed bug tracking and defect documentation, ensuring timely fixes and quality releases.
- Prepared and maintained QA documentation to support development and product teams.

eiMAN Task Management
Link: https://staging.eiman.de/login
- Web-based platform for task management, project tracking, and team collaboration.
- Features task assignments, progress tracking, status updates, attachments, and checklists.
- Conducted manual and functional testing of web features.
- Performed API testing to ensure accurate integration with the mobile platform.
- Validated performance, responsiveness, and data accuracy across browsers.

eiMAN MNL
Link: https://play.google.com/store/apps/details?id=eiman.mobile.starter
- Mobile version of the eiMAN web platform for on-the-go task management.
- Enables quick updates, task monitoring, and notifications directly from mobile devices.
- Supports real-time collaboration, ensuring web and mobile experiences are seamlessly connected.
- Conducted manual and functional testing on mobile features and ensured seamless web-to-mobile integration through API validation.

eiRIS (HRIS System)
- Human Resource Information System (HRIS) for managing employee data, attendance, and payroll.
- Conducted manual and API testing, including endpoint validation, authentication, and data accuracy.
- Ensured HR system reliability, performance, and compliance with business requirements.

QA Documentation (Test Cases & Scenarios Samples)
Link: https://drive.google.com/drive/folders/1CeZjRDKgp-PfQyG6e4i49xBk_7Jk7qQy
- Comprehensive quality assurance reference for the eiMAN system.
- Includes detailed test cases and scenarios for both web and mobile functionalities.
- Ensures system reliability, performance, and feature accuracy before release.

eiRIS Biometrics (Facial Recognition)
- Biometric attendance and access control system using facial recognition for secure employee authentication and time tracking.
- Conducted manual and API testing to validate facial recognition workflows, attendance logging, user enrollment, and authentication endpoints.
- Verified data accuracy, performance, and security, ensuring reliable biometric matching, correct attendance records, and compliance with business and HR policies.

eiRIS Employee Portal (Mobile Version)
- Mobile employee self-service portal for leave, WFH, official business, shift changes, undertime/overtime, with attendance, time-in/out, and payslip viewing.
- Tested API response handling, status updates, and data synchronization between mobile app and HRIS backend.
- Validated role-based access control for requestors and multiple approvers.

EDUCATION

- **2021-2025**   **UNIVERSITY OF RIZAL SYSTEM**
  - Bachelor of Science in Information Technology
